## Comfort Throughout The Home

68% of homeowners feel uncomfortably warm in at least one area of their home according to a 2013 Decision Analysts survey. Rising heat, sun exposure, number of windows, etc. can cause the living or bedroom area in one and two-story homes to be uncomfortably warm or uncomfortably cool.

The Comfort365 solves the problem by automatically controlling heating, cooling and AIRFLOW and directing conditioned air to the area that needs it.

The C365 thermostat monitors the temperature in the living area and the temperature in the bedroom area and every 2 minutes, during heating and cooling calls, compares the temperatures and automatically adjusts the airflow 2% so that more airflow is directed to the area that needs it for uniform comfort in the living and bedroom areas.

## Nighttime Energy Savings

The Comfort365 includes Energy Star nighttime setback temperatures. For additional energy savings, homeowners can take advantage of the Nighttime Airflow option which uses the temperature sensor in the bedroom

area to control heating and cooling calls and direct more airflow to the bedroom area at night and less airflow to the unoccupied living area.

## Modern Touchscreen Thermostat

Your homeowners will appreciate the modern, touch screen thermostat with high definition LCD display compared to the outdated, non-touch builder grade thermostats used in conventional zoning with small LCD displays.

## A Connected Home

The Comfort365 can easily be upgraded to WiFi to provide your homeowners with remote access to their home's heating and cooling system. The Comfort365 WiFi version simply plugs into the same subbase - no additional wiring needed. Also, homeowners will appreciate that only one Comfort365 WiFi thermostat is required compared to zoning which requires purchasing two WiFi thermostats.

## Comfort365 vs Zoning

The Comfort365 is a much simpler install than zoning and offers the **lowest installed cost**.

- Eliminates installing and wiring zoning panel, DAT sensor and transformer
- Eliminates the installation of a bypass duct and bypass damper in areas outside of California where bypass is allowed.
- Reduces HERS zoning testing.

## Builder and Contractor Approved

Introduced in Southern California, 2nd quarter of 2016, the Comfort365 is now being specified and installed by the following new home builders and HVAC contractors.

## Homeowner Resources

Homeowner resources are available online at [www.Comfort365USA.com](http://www.Comfort365USA.com), including a consumer video describing the features and outlining the operation of the Comfort365.

## Quality Backed By Experience

With nearly 20 years of experience manufacturing zoning products for some of the top zoning companies, we bring innovative and reliable solutions to home comfort. We are committed to excellence at all levels from manufacturing to customer service and continually strive to exceed expectations.

## 5-Year Limited Warranty
